**NRC# 1070627 – Ohio River MCHM Spill, Kanawha County, West Virginia/Ashland, Boyd County, Kentucky**

OSC Art Smith is mobilizing to Cincinnati, Ohio to ensure the response to the Ohio River MCHM Spill. MCHM has been detected down river near Ashland, Kentucky and EPA Region 4 and KYDEP are concerned about further impact downstream. OSC Smith plans to integrate with ORSANCO and facilitate data sharing and transfer with EPA and KYDEP as well as review data quality and response adequacy. OSC Smith will also activate ERT personnel to assist with data and method reviews and potential future supplemental sampling. – OSC Smith – 502-905-7559

The Ohio River Valley Water and Sanitation Commission (ORSANCO) continues to track the 4-methylcyclohexanemethanol (MCHM) plume as it travels down the Ohio River. The plume is estimated to reach the Louisville, KY water intake at approximately 0700 hrs on 1/17/14. OSC Smith continues to coordinate with ORSANCO and Kentucky Department of Environmental Protection (KYDEP) regarding plume tracking and sample collection. KYDEP is conducting surface water sampling along the Ohio River to track the plume and its effects. The United States Geological Survey (USGS) also collected surface water samples and they will be analyzed by the Environmental Protection Agency Environmental Response Team (EPA ERT) lab in Edison, New Jersey.
